OPENCV

NUMPY

OPENVINO

MEDIAPIPE

PYTHON

ULTRALYTICS

ROBOFLOW

PYQT6

COELHO VISION is a Computer Vision & AI project, developed to show some modern applications towards industry and companies. Besides a web version, there's also a software version to solve processing latency time, making it to run faster when you use the Windows software version.

And what are all the tools of COELHO VISION?

Object Detection: Dive into the world of Object Detection, Image Classification, and Face Detection.

Image Segmentation: Experience unparalleled precision in image segmentation.

Pose Estimation: Discover tools for Gesture Recognition, Hand Landmarking, and Pose Estimation.

Live Camera: Bring all these tools to life with your notebook or smartphone camera.

Whether you're a developer, a technology enthusiast, or just curious about the latest in AI and Computer Vision, COELHO VISION is the newest and best tool for you to get to know and explore the world of Computer Vision with integrated Artificial Intelligence.

Explore the future of imagery with us. Join the vision revolution!

COELHO VISION

Software Version

COELHO VISION is an advanced Computer Vision software offering features like Object Detection, Object Tracking, Image Classification, Image Segmentation, Depth Estimation, and Pose Estimation. The Windows version provides a significant performance boost, minimizing latency and ensuring a smoother, faster experience compared to the web version.

Optimize your computer vision projects with the powerful and reliable Windows version of COELHO VISION. Click the link below to download and experience the difference!

Download COELHO VISION software (Windows version)

Disclaimer: for Linux and Mac versions, there is no software version. You must clone the source repository and run it using Python ([GitHub repository](#))

About Us

About Us

Rafael Coelho is a Brazilian Mathematics student who is passionate for Data Science and Artificial Intelligence and works in both areas for over 4 years, with solid knowledge in technologic areas such as Machine Learning, Deep Learning, Data Science, Computer Vision, Reinforcement Learning, NLP and others.

Recently, he worked in one of the Big Four companies for over a year.
